

Regulations for Interior Fences

1. Only split rail type fence is allowed.
2. Construction material may be cedar, redwood, or other hardwood material available. PVC (plastic) type material must be approved by the A&SI committee prior to construction.
3. Standard split rails and post are to be used.
4. Lot owners **MUST** obtain a copy of their plat to insure property boundaries and set-backs are not violated prior to construction. A survey, at owners cost, is recommended if boundary lines are suspect.
